Abdel-Malek, Layek L.; *The Effect of Robots with Overlapping Envelopes on the Performance of Flexible Transfer Lines*; June; p. 213.

Agnihothri, Saligrama R.; *A Mean Value Analysis of the Travelling Repairman Problem*; June; p. 223.

Albright, S. Christian and A. Soni; *An Approximation to the Stationary Distribution of a Multidimensional Markov Process*; March; p. 111.

Allman, William P.; *Commodity Supply Allocation with Linear Costs Recognizing Linear Quality Premium/Penalty Payments*; December; p. 364.

Amar, Amar Deu and Eugene N. Vasilescu; *On the Scheduling of Identical Processors with Entrapment*; March; p. 88.

Ardalan, Alireza; *Optimal Ordering Policies in Response to a Sale*; September; p. 292.

Atkins, Derek R. and Paul O. Iyogun; *A Heuristic with Lower Bound Performance Guarantee for the Multi-Product Dynamic Lot-Size Problem*; December; p. 369.

Badarinath, N. B., J. R. Buck and V. Kachitvichyanukul; *Cognitive Task Performance Time and Accuracy In Supervisory Process Control*; June; p. 122.

Bailey, James E. and Irem Ozkarahan; *Goal Programming Model Subsystem of a Flexible Nurse Scheduling Support System;* September; p. 306.

Baker, Kenneth R.; *Scheduling the Production of Components at a Common Facility*; March; p. 32.

Bard, Jonathan F.; *A Heuristic for Minimizing the Number of Tool Switches on a Flexible Machine*; December; p. 382.

Berens, Wolfgang; *How to Inspire Students Suffering from Information-Overload*; March; p. 119.

Boucher, Thomas O.; *Adam Smith and the Humanists: An Enquiry into the Productivity of Labor Controversy*; March. p. 73.

Boyd, Amy Hancock and Gary D. Herrin; *A Minimum Cost Sequential Test to Monitor Injury Incidence on an Operation*; September; p. 269.

Buck, J. R., N. B. Badarinath and V. Kachitvichyanukul; *Cognitive Task Performance Time and Accuracy in Supervisory Process Control*; June; p. 122.

Chakravarty, Amiya K.; *Line Balancing with Task Learning Effects*; June; p. 186.

Chan, Thomas J. and Walton M. Hancock; *Productivity and Staffing of Hospital Units with Uncertainty in the Demand for Service*; December; p. 346.

Chandra, Jeya and Susan Schall; *The Use of Repeated Measurements to Reduce the Effect of Measurement Errors* March; p. 83.

Chang, Heng, Hsu-Pin Wang and Richard A. Wysk; *An Analytical Approach to Optimize NC Tool Path Planning for Face Milling Flat Convex Polygonal Surfaces*; September; p. 325.

Charles-Owaba, O. E. and B. K. Lambert; *Sequence Dependent Machine Set-Up Times and Similarity of Parts: A Mathematical Model*; March; p. 12.

Chen Yu-Tong and Robert E. Young; *PACIES: A PArt Code Identification Expert System*; June; p. 132.

Chung, Min K., Gary D. Herrin and Stephen M. Pollock; *A Stochastic Model for the Analysis of Occupational Injuries on Jobs of Varying Physical Stresses*; September; p. 263.

Dallery, Yves, Rene David and Xiao-Lan Xie; *An Efficient Algorithm for Analysis of Transfer Lines with Unreliable Machines and Finite Buffers*; September; p. 280.

Das, Sanchoy K. and Subhash C. Sarin; *Selection of a Set of Part Delivery Dates in a Multi-Job Stochastic Assembly System*; March; p. 4.

David, Rene, Yves Dallery and Xiao-Lan Xie; *An Efficient Algorithm for Analysis of Transfer Lines with Unreliable Machines and Finite Buffers*; September; p. 280.

De Koster, M. B. M.; *Approximation of Flow Lines with Integrally Controlled Buffers*; December; p. 374.

Deutsch, Stuart J. and Charles J. Malmborg; *A Stock Location Model for Dual Address Order Picking Systems*; March; p. 44.

Drezner, Zvi; *Maximizing the Minimum Sight Angle of a Set of Shapes*; June; p. 194.

Ehrhardt, Richard; *Indifference Functions for Price-Adjusted Acceptance Sampling*; March; p. 68.

Geng, P. C. and R. G. Vickson; *WRLSP: A Single-Machine, Warehouse Restricted Lot Scheduling Problem*; December; p. 354.

Gerchak, Yigal, Raymond G. Vickson and Mahmut Parlar; *Periodic Review Production Models With Variable Yield and Uncertain Demand*; June; p. 144.

Globerson, Shlomo and Abraham Seidmann; *The Effects of Imposed Learning Curves on Performance Improvements*; September; p. 317.

Goetschalckx, Marc and H. Donald Ratliff; *Order Picking In An Aisle*; March; p. 53.

Haddock, Jorge; *A Simulation Generator for Flexible Manufacturing Systems Design and Control*; March; p. 22.

Han, Min-Hong and Leon F. McGinnis; *Throughput Rate Maximization in Flexible Manufacturing Cells*; December; p. 409.

Hancock, Walton M. and Thomas J. Chan; *Productivity and Staffing of Hospital Units with Uncertainty in the Demand for Service*; December; p. 346.

Herrin, Gary D., Min K. Chung and Stephen M. Pollock; *A Stochastic Model for the Analysis of Occupational Injuries on Jobs of Varying Physical Stresses*; September; p. 263.

Herrin, Gary D. and Amy Hancock Boyd; *A Minimum Cost Sequential Test to Monitor Injury Incidence on an Operation*; September; p. 269.

Iyogun, Paul O. and Derek R. Atkins; *A Heuristic with Lower Bound Performance Guarantee for the Multi-Product Dynamic Lot-Size Problem*; December; p. 369.

Jo, Kyung Y.; *Optimal Design of Multiserver Queueing Systems with Different Waiting Costs for Time in Queue and Time in Service*; June; p. 235.

Kachitvichyanukul, V., J. R. Buck and N. B. Badarinath; *Cognitive Task Performance Time and Accuracy in Supervisory Process Control*; June; p. 122.

Kaplan, Alan J.; *Bayesian Approach to Inventory Control of New Parts*; June; p. 151.

Keller, Gerald and Hamid Noori; *Justifying New Technology Acquisition Through its Impact on the Cost of Running and Inventory Policy*; September; p. 284.

Klein, M. and R. Tibrewala; *Solving the Shortest Route Problem*; June; p. 210.

Lambert, B. K. and O. E. Charles-Owaba; *Sequence Dependent Machine Set-Up Times and Similarity of Parts: A Mathematical Model*; March; p. 12.

Lau, Amy Hing-Ling and Hon-Shiang Lau; *The Newsboy Problem with Price-Dependent Demand Distribution*; June; p. 168.

Lau, Hon-Shiang and Amy Hing-Ling Lau; *The Newsboy Problem with Price-Dependent Demand Distribution*; June; p. 168.

Lee, Hau L.; *On the Optimality of a Simplified Multicharacteristic Component Inspection Model*; December; p. 392.
Lee, Hau L. and Meir J. Rosenblatt; *Economic Design and Control of Monitoring Mechanisms in Automated Production Systems*; June; p. 201.
Lee, Hyun-Chan and Tony C. Woo; *Determining in Linear Time the Minimum Area Convex Hull of Two Polygons*; December; p. 338.

McGinnis, Leon F. and Min-Hong Han; *Throughput Rate Maximization in Flexible Manufacturing Cells*; December; p. 409.
Malmborg, Charles J. and Stuart J. Deutsch: *A Stock Location Model for Dual Address Order Picking Systems*; March; p. 44.
Malstrom, Eric M., Russell D. Tsai, and Howard D. Meeks; *A Two-Dimensional Palletizing Procedure for Warehouse Loading Operations*; December; p. 418.
Meeks, Howard D., Russell D. Tsai, and Eric M. Malstrom; *A Two-Dimensional Palletizing Procedure for Warehouse Loading Operations*; December; p. 418.

Nandi, S. N., D. K. Shah and A. G. Phatak; *A Correction Note on "Minimum Cost Quality Control Tests"*; June; p. 231.
Noori, Hamid and Gerald Keller; *Justifying New Technology Acquisition Through its Impact on the Cost of Running and Inventory Policy*; September; p. 284.
Nuttle, Henry L. W. and Gerald W. Shapiro; *Hoist Scheduling for a PCB Electroplating Facility*; June; p. 157.

Ozkarahan, Irem and James E. Bailey; *Goal Programming Model Subsystem of a Flexible Nurse Scheduling Support System;* September; p. 306.

Parlar, Mahmut, Yigal Gerchak and Raymond G. Vickson; *Periodic Review Production Models with Variable Yield and Uncertain Demand*; June; p. 144.
Pentico, David W.; *An Evaluation and Proposed Modification of the Sepehri-Silver-New Heuristic for Multiple Lot Sizing Under Variable Yield*; December; p. 360.
Petersen, Clifford C. and Charles H. Reilly; *Implementation Planning for a USAF-Wide Cardiovascular-Risk-Reduction Program*; March; p. 97.
Phatak, A. G., S. N. Nandi and D. K. Shah; *A Correction Note on "Minimum Cost Quality Control Tests"*; June; p. 231.
Pignatiello, Joseph J. and Amos Tsai; *Optimal Economic Design of X-Control Charts When Cost Model Parameters are Not Precisely Known*; March; p. 103.
Pignatiello, Joseph J.; *An Overview of the Strategy and Tactics of Taguchi*; September; p. 247.
Pollock, Stephen M., Min K. Chung and Gary D. Herrin; *A Stochastic Model for the Analysis of Occupational Injuries on Jobs of Varying Physical Stresses*; September; p. 263.

Ratliff, H. Donald and Marc Goetschalckx; *Order Picking In An Aisle*; March; p. 53.
Reilly, Charles H. and Clifford C. Petersen; *Implementation Planning for a USAF-Wide Cardiovascular-Risk-Reduction Program*; March; p. 97.
Rosenblatt, Meir J. and Hau L. Lee; *Economic Design and Control of Monitoring Mechanisms in Automated Production Systems*; June; p. 201.
Rossi, Michael A. and Robert E. Young; *Toward Knowledge-Based Control of Flexible Manufacturing Systems*; March; p. 36.

Sarin, Subhash C. and Sanchoy K. Das; *Selection of a Set of Part Delivery Dates in a Multi-Job Stochastic Assembly System*; March; p. 4.
Sastri, T.; *An Adaptive Estimation Algorithm*; June; p. 176.
Schall, Susan and Jeya Chandra; *The Use of Repeated Measurements to Reduce the Effect of Measurement Errors*; March; p. 83.
Seidmann, Abraham and Shlomo Globerson; *The Effects of Imposed Learning Curves on Performance Improvements*; September; p. 317.
Shah, D. K., S. N. Nandi and A. G. Phatak; *A Correction Note on "Minimum Cost Quality Control Tests"*; June; p. 231.
Shapiro, Gerald W. and Henry L. W. Nuttle; *Hoist Scheduling for a PCB Electroplating Facility*; June; p. 157.
Shore, Haim; *An Approximation for the Error of the Normal Approximation to a Linear Combination of Independently Distributed Random Variables*; September; p. 242.
Silver, Edward A.; *Correctly Evaluating a Solution Method that is Based on an Approximate Model*; September; p. 333.
Smith-Daniels, Vicki; *A Heuristic Procedure for Scheduling Packaging Lines in Process Industries*; September; p. 295.

Young, Robert E. and Yu-Tong Chen; *PACIES: A PArt Code Identification Expert System*; June; p. 12.

Subject Index

0100 Costs

0102 Cost Controls

Indifference Functions For Price-Adjusted Acceptance Sampling; Ehrhardt, Richard; March; p. 68.

Economic Design and Control of Monitoring Mechanisms in Automated Production Systems; Lee, Hau L. and Meir J. Rosenblatt; June; p. 201.

0103 Cost Estimating

Optimal Economic Design of X-Control Charts When Cost Model Parameters are Not Precisely Known; Pignatiello, Joseph J. and Amos Tsai; March; p. 103.

A Correction Note On "Minimum Cost Quality Control Tests"; Nandi, S. N., D. K. Shah and A. G. Phatak; June; p. 231.

A Minimum Cost Sequential Test to Monitor Injury Incidence on an Operation; Boyd, Amy Hancock and Gary D. Herrin; September; p. 269.

0104 Cost Reduction Programs

Justifying New Technology Acquisition Through its Impact on the Cost of Running an Inventory Policy; Keller, Gerald and Hamid Noori; September; p. 284.

Optimal Ordering Policies in Response to a Sale; Ardalan, Alireza; September; p. 292.

On the Optimality of a Simplified Multicharacteristic Component Inspection Model; Lee, Hau L.; December; p. 392.

0200 Employee Relations

0300 Engineering Economics

0400 Facilities Planning, Design

0405 Plant Layout Analysis

Maximizing the Minimum Sight Angle of a Set of Shapes; Drezner, Zvi; June; p. 194.

0500 Functional Operations

0600 Human Engineering

0604 Learning

How to Inspire Students Suffering from Information-Overload; Berens, Wolfgang; March; p. 119.

Line Balancing with Task Learning Effects; Chakravarty, Amiya K.; June; p. 186.

The Effects of Imposed Learning Curves on Performance Improvements; Globerson, Shlomo and Abraham Seidmann; September; p. 317.

0605 Motivation

The Effects of Imposed Learning Curves on Performance Improvements; Globerson, Shlomo and Abraham Seidmann; September; p. 317.

0606 Personnel Scheduling

Goal Programming Model Subsystem of a Flexible Nurse Scheduling Support System; Ozkarahan, Irem and James E. Bailey; September; p. 306.

Productivity and Staffing of Hospital Units with Uncertainty in the Demand for Service; Hancock, Walton M. and Thomas J. Chan; December; p. 346.

0608 Safety and Health

A Stochastic Model for the Analysis of Occupational Injuries on Jobs of Varying Physical Stresses; Chung, Min K., Gary D. Herrin and Stephen M. Pollock; September; p. 263.

A Minimum Cost Sequential Test to Monitor Injury Incidence on an Operation; Boyd, Amy Hancock and Gary D. Herrin; September; p. 269.

0700 Incentive Plans

0900 Industries

0903 Health Care and Other Services

Implementation Planning for a USAF-Wide Cardiovascular-Risk-Reduction Program; Reilly, Charles H. and Clifford C. Peterson; March; p. 97.

Goal Programming Model Subsystem of a Flexible Nurse Scheduling Support System; Ozkarahan, Irem and James E. Bailey; September; p. 306.

Productivity and Staffing of Hospital Units with Uncertainty in the Demand for Service; Hancock, Walton M. and Thomas J. Chan; December; p. 346.

0904 Manufacturing

Hoist Scheduling for a PCB Electroplating Facility; Shapiro, Gerald W. and Henry L. W. Nuttle; June; p. 157.

1000 Management

1003 Decision Making

Toward Knowledge-Based Control of Flexible Manufacturing Systems; Young, Robert E. and Michael A. Rossi; March; p. 36.

An Overview of the Strategy and Tactics of Taguchi; Pignatiello, Jr., Joseph J.; September; p. 247.

1100 Material Handling

1101 Containers, Unit Loads

A Two-Dimensional Palletizing Procedure for Warehouse Loading Operations; Tsai, Russell D., Eric M. Malstrom, and Howard D. Meeks; December; p. 418.

1105 Dispatching, Scheduling

Order Picking In An Aisle; Goetschalckx, Marc and H. Donald Ratliff; March; p. 53.

A Comparison of Flow and Queue Time Variances in Machine-Limited Versus Dual-Resource-Constrained Systems; Treleven, Mark; March; p. 63.

1111 Storage, Warehousing

A Stock Location Model for Dual Address Order Picking Systems; Malmborg, Charles J. and Stuart J. Deutsch; March; p. 44.

1200 Methods Engineering

1202 Computer Control

PACIES: A PArt Code Identification Expert System; Chen, Yu-Tong and Robert E. Young; June; p. 132.

1205 Manufacturing Engineering

Toward Knowledge-Based Control of Flexible Manufacturing Systems; Young, Robert E. and Michael A. Rossi; March; p. 36.

Economic Design and Control of Monitoring Mechanisms in Automated Production Systems; Lee, Hau L. and Meir J. Rosenblatt; June; p. 201.

The Effect of Robots with Overlapping Envelopes on the Performance of Flexible Transfer Lines; Abdel-Malek, Layek L.; June; p. 213.

An Efficient Algorithm for Analysis of Transfer Lines With Unreliable Machines and Finite Buffers; Dallery, Yves, Rene David and Xiao-Lan Xie; September; p. 280.

An Analytical Approach to Optimize NC Tool Path Planning for Face Milling Flat Convex Polygonal Surfaces; Wang, Hsu-Pin, Heng Chang and Richard A. Wysk; September; p. 325.

Approximation of Flow Lines with Integrally Controlled Buffers; De Koster, M.B.M.; December; p. 374.

Determining in Linear Time the Minimum Area Convex Hull of Two Polygons; Lee, Hyun-Chan and Tony C. Woo; December; p. 338.

Throughput Rate Maximization in Flexible Manufacturing Cells; Han, Min-Hong and Leon F. McGinnis; December; p. 409.

1209 Process Design

Line Balancing with Task Learning Effects; Chakravarty, Amiya K.; June; p. 186.

1213 Work Design, Methods Improvement

Adam Smith and the Humanists: An Enquiry into the Productivity of Labor Controversy; Boucher, Thomas O.; March; p. 73.

Cognitive Task Performance Time and Accuracy in Supervisory Process Control; Buck, J. R., N. B. Badarinath and V. Kachitvichyanukul.

The Effects of Imposed Learning Curves on Performance Improvements; Globerson, Shlomo and Abraham Seidmann; September; p. 317.

1300 Quantitative Methods

1301 Mathematical Models

Selection of a Set of Part Delivery Dates in a Multi-Job Stochastic Assembly System; Das, Sanchoy K. and Subhash

C. Sarin; March; p. 4.
Sequence Dependent Machine Set-Up Times and Similarity of Parts: A Mathematical Model; Charles-Owaba, O. E. and B. K. Lambert; March; p. 12.
Scheduling the Production of Components at a Common Facility; Baker, Kenneth R.; March; p. 32.
Order Picking In An Aisle; Goetschalckx, Marc and H. Donald Ratliff; March; p. 53.
Bayesian Approach to Inventory Control of New Parts; Kaplan, Alan J.; June; p. 151.
Hoist Scheduling for a PCB Electroplating Facility; Shapiro, Gerald W. and Henry L. W. Nuttle; June; p. 157.
The Newsboy Problem with Price-Dependent Demand Distribution; Lau, Amy Hing-Ling and Hon-Shiang Lau; June; p. 168.
An Adaptive Estimation Algorithm; Sastri, T.; June; p. 176.
Maximizing the Minimum Sight Angle of a Set of Shapes; Drezner, Zvi; June; p. 194.
A Mean Value Analysis of the Travelling Repairman Problem; Agnihothri, Saligrama R.; June; p. 223.
Optimal Design of Multiserver Queueing Systems with Different Waiting Costs for Time in Queue and Time in Service; Jo, Kyung Y.; June; p. 235.
An Efficient Algorithm for Analysis of Transfer Lines With Unreliable Machines and Finite Buffers; Dallery, Yves, Rene David and Xiao-Lan Xie; September; p. 280.
A Heuristic Procedure for Scheduling Packaging Lines in Process Industries; Smith-Daniels, Vicki L.; September; p. 295.
Goal Programming Model Subsystem of a Flexible Nurse Scheduling Support System; Ozkarahan, Irem and James E. Bailey; September; p. 306.
An Analytical Approach to Optimize NC Tool Path Planning for Face Milling Flat Convex Polygonal Surfaces; Wang, Hsu-Pin, Heng Chang and Richard A. Wysk; September; p. 325.
Correctly Evaluating a Solution Method that is Based on an Approximate Model; Silver, Edward A.; September; p. 333.
Using Coupled EWMA Control Charts for Monitoring Processes with Linear Trends; Sweet, Arnold L.; December; p. 404.
Determining in Linear Time the Minimum Area Convex Hull of Two Polygons; Lee, Hyun-Chan and Tony C. Woo; December; p. 338.
A Heuristic with Lower Bound Performance Guarantee for the Multi-Product Dynamic Lot-Size Problem; Atkins, Derek R. and Paul O. Iyogun; December; p. 369.

1302 Networks
Solving the Shortest Route Problem; Klein, M. and R. Tibrewala; June; p. 210.

1303 Programming: Linear, Nonlinear
Implementation Planning for a USAF-Wide Cardiovascular-Risk-Reduction Program; Reilly, Charles H. and Clifford C. Peterson; March; p. 97.
An Optimization Based Heuristic for Scheduling Parallel Project Networks with Constrained Renewable Resources; Weiss, Elliott N.; June; p. 137.
Hoist Scheduling for a PCB Electroplating Facility; Shapiro, Gerald W. and Henry L. W. Nuttle; June; p. 157.
A Heuristic for Minimizing the Number of Tool Switches on a Flexible Machine; Bard, Jonathan F.; December; p. 382.
WRLSP: A Single-Machine, Warehouse Restricted Lot Scheduling Problem; Geng, P. C. and R. G. Vickson; December; p. 354.
Commodity Supply Allocation with Linear Costs Recognizing Linear Quality Premium/Penalty Payments; Allman, William P.; December; p. 364.
Throughput Rate Maximization in Flexible Manufacturing Cells; Han, Min-Hong and Leon F. McGinnis; December; p. 409.
A Two-Dimensional Palletizing Procedure for Warehouse Loading Operations; Tsai, Russell D., Eric M. Malstrom, and Howard D. Meeks; December; p. 418.

1305 Simulation/Games
A Simulation Generator for Flexible Manufacturing Systems Design and Control; Haddock, Jorge; March; p. 22.
An Adaptive Estimation Algorithm; Sastri, T.; June; p. 176.
The Effect of Robots with Overlapping Envelopes on the Performance of Flexible Transfer Lines; Abdel-Malek, Layek L.; June; p. 213.

1306 Applied Probability
The Use of Repeated Measurements to Reduce the Effect of Measurement Errors; Chandra, Jeya and Susan Schall; March; p. 83.
An Approximation to the Stationary Distribution of a Multidimensional Markov Process; Albright, S. Christian and A. Soni; March; p. 111.
The Effect of Robots with Overlapping Envelopes on the Performance of Flexible Transfer Lines; Abdel-Malek, Layek L.; June; p. 213.
A Mean Value Analysis of the Travelling Repairman Problem; Agnihothri, Saligrama R.; June; p. 223.
Optimal Design of Multiserver Queueing Systems with Different Waiting Costs for Time in Queue and Time in Service; Jo, Kyung Y.; June; p. 235.
An Approximation for the Error of the Normal Approximation to a Linear Combination of Independently Distributed Random Variables; Shore, Haim; September; p. 242.
An Overview of the Strategy and Tactics of Taguchi; Pignatiello, Jr., Joseph J.; September; p. 247.
On Sample Size Determination and Inference in Work Sampling; Tryfos, Peter; September; p. 255.
A Stochastic Model for the Analysis of Occupational Injuries on Jobs of Varying Physical Stresses; Chung, Min K., Gary D. Herrin and Stephen M. Pollock; September; p. 263.
Using Coupled EWMA Control Charts for Monitoring Processes with Linear Trends; Sweet, Arnold L.; December; p. 404.
Optimal Run Quantities for an Assembly System with Random Yields; Yao, David D.; December; p. 399.

1400 Production and Inventory Control

1403 Inventory Control
Indifference Functions For Price-Adjusted Acceptance Sampling; Ehrhardt, Richard; March; p. 68.
Periodic Review Production Models with Variable Yield and Uncertain Demand; Gerchak, Yigal, Raymond G. Vickson and Mahmut Parlar; June; p. 144.
Bayesian Approach to Inventory Control of New Parts; Kaplan, Alan J.; June; p. 151.
The Newsboy Problem with Price-Dependent Demand Distribution; Lau, Amy Hing-Ling and Hon-Shiang Lau; June; p. 168.
Justifying New Technology Acquisition Through its Impact on the Cost of Running an Inventory Policy; Keller, Gerald and Hamid Noori; September; p. 284.
Optimal Ordering Policies in Response to a Sale; Ardalan, Alireza; September; p. 292.
WRLSP: A Single-Machine, Warehouse Restricted Lot Scheduling Problem; Geng, P. C. and R. G. Vickson; December; p. 354.
A Heuristic with Lower Bound Performance Guarantee for the Multi-Product Dynamic Lot-Size Problem; Atkins, Derek R. and Paul O. Iyogun; December; p. 369.

1405 Production Control
Economic Design and Control of Monitoring Mechanisms in Automated Production Systems; Lee, Hau L. and Meir J. Rosenblatt; June; p. 201.
Approximation of Flow Lines with Integrally Controlled Buffers; De Koster, M.B.M.; December; p. 374.

1406 Production Planning
Optimal Run Quantities for an Assembly System with Random Yields; Yao, David D.; December; p. 399.
An Evaluation and Proposed Modification of the Sepehri-Silver-New Heuristic for Multiple Lot Sizing Under Variable Yield; Pentico, David W.; December; p. 360.
A Heuristic with Lower Bound Performance Guarantee for the Multi-Product Dynamic Lot-Size Problem; Atkins,

Derek R. and Paul O. Iyogun; December; p. 369.
1407 Production Scheduling
Selection of a Set of Part Delivery Dates in a Multi-Job Stochastic Assembly System; Das, Sanchoy K. and Subhash C. Sarin; March; p. 4.
Sequence Dependent Machine Set-Up Times and Similarity of Parts: A Mathematical Model; Charles-Owaba, O. E. and B. K. Lambert; March; p. 12.
Scheduling the Production of Components at a Common Facility; Baker, Kenneth R.; March; p. 32.
On the Scheduling of Identical Processors with Entrapment; Amar, Amar Deu and Eugene N. Vasilescu; March; p. 88.
An Optimization Based Heuristic for Scheduling Parallel Project Networks with Constrained Renewable Resources; Weiss, Elliott N.; June; p. 137.
A Heuristic Procedure for Scheduling Packaging Lines in Process Industries; Smith-Daniels, Vicki L.; September; p. 295.
A Heuristic for Minimizing the Number of Tool Switches on a Flexible Machine; Bard, Jonathan F.; December; p. 382.
WRLSP: A Single-Machine, Warehouse Restricted Lot Scheduling Problem; Geng, P. C. and R. G. Vickson; December; p. 354.
1500 Quality Control
1501 Inspection
On the Optimality of a Simplified Multicharacteristic Component Inspection Model; Lee, Hau L.; December; p. 392.
1502 Quality Control
Optimal Economic Design of X-Control Charts When Cost Model Parameters are Not Precisely Known; Pignatiello, Joseph J. and Amos Tsai; March; p. 103.
A Correction Note On "Minimum Cost Quality Control Tests"; Nandi, S. N., D. K. Shah and A. G. Phatak; June; p. 231.
An Overview of the Strategy and Tactics of Taguchi; Pignatiello, Jr., Joseph J.; September; p. 247.
Using Coupled EWMA Control Charts for Monitoring Processes with Linear Trends; Sweet, Arnold L.; December; p. 404.
Commodity Supply Allocation with Linear Costs Recognizing Linear Quality Premium/Penalty Payments; Allman, William P.; December; p. 364.
1504 Sampling
The Use of Repeated Measurements to Reduce the Effect of Measurement Errors; Chandra, Jeya and Susan Schall; March; p. 83.
On Sample Size Determination and Inference in Work Sampling; Tryfos, Peter; September; p. 255.

Guest Reviewers for 1988

Panos Afentakis, Syracuse University
